MEETINGS OF SCIENTIFIC BODIES

To be held during the ensuing week.

TUESDAY, Jan. 15.—Institution of Civil Engineers, 8 p.m.
WEDNESDAY, 16.—Society of Arts, 8 p.m.
THURSDAY, 17.—Royal Society, 8½ p.m.; Society of Antiquaries, 8 p.m.; Royal Academy, 8 p.m.

TO CORRESPONDENTS.

"*Water Tanks.*"—Will some of your readers tell me a cheap and efficient way of making water tanks—size, 35 feet by 15 feet? Fire bricks built with Roman cement are recommended, but perhaps they can point out a better plan, with a covering for same.—B.

"*Lowe's Stench Trap Grid.*"—With reference to our notice of this, Mr. S. S. Rawlinson has favoured us with a letter, showing that cast-iron stench traps, similar in principle, have been used in his town (Nottingham) for twenty years.

"W. d'E." (we are flattered by good opinion; the only objection we have to complying with the request is our personal connection with the building); it shall not be lost sight of, however). "*Fabric Ecclesiæ*" (shall appear). "R. D." "F. P. A." "C. C." (we have not time to refer). "T. L. W." (we shall be glad to receive news). "One of the Deputy." "E. A." "W. W." "G. P." and "J. G." (publisher will write). "J. M." (inquire at Registrar's, Somerset House). "Copyism" (the paragraph last week then headed being signed B., and referring to Brandon's "Analysis," the author of that work wishes us to mention that it was not written by him). "Lady B." (next week). "J. M." "A." (we do not know; he would learn at the Registrar's office). "B. B." (shall hear from us). "F. C. H." (send us particulars; we are disposed to engrave it). "Jos." Sheffield (write to the secretary of Institute, 10, Grosvenor-street, London). "G. W." "J. J. L." (shall hear). "A. Hart." "R. N." (please call in York-street). "E. S." "J. H., jun." "X." "J. L." Manchester. "A. Z." "Junius." (Messrs. F. and G. are the architects; we will inquire into the fact mentioned). "J. R." (the knotting alluded to is insoluble in water; the manufacturers, by whom the letter was written, decline to state its composition). "M. Bro." (your letter was simply a personal advertisement, then?). "T. L." "B. and M." "J. J. (shall appear)." "A Treatise on the Progress of Decorated Window Tracery," by Edmund Sharpe, M.A., architect (London, John Van Voorst); "Churches of the Middle Ages," (Part IV.); "Bradshaw's Railway Shareholders' Guide and Manual (Adams, London; and Bradshaw and Co., Manchester).

NOTICE!—All communications respecting *advertisements* should be addressed to the "Publisher," and not to the "Editor;" all other communications should be addressed to the EDITOR, and *not* to the Publisher.

"*Books and Addresses.*"—We have not time to point out books or find addresses.

ADVERTISEMENTS.

TO CONSUMERS of PLASTER of PARIS.—The Advertiser is in a position to supply the above article in quantity at extreme low rates.—Particulars may be had on application.—Address, W. B. WILKINSON, Prudhoe-street, Newcastle-on-Tyne.

GREAVES'S BLUE LIAS LIME, WARWICKSHIRE CEMENT, BLUE DAWN FLAG, PAVING STONE, and MARBLE WORKS, WARWICK. Agents—Messrs. Ratty and Verey, 3, South Wharf, Paddington; Messrs. Nesbitt, Pedder's-row, Lambeth; Mr. J. Thompson, Back King-street, Manchester; Mr. T. Wylie, 1, Royal Bank buildings, Liverpool; Mr. J. Harrison, Limeshall-street, Chester; Mr. T. E. Myerscough, Preston; Mr. F. Fargeus, Sheffield; Mr. J. Bengough, 31, Bartley-street, Birmingham; and can be delivered by the Proprietor's own boats to any part of the kingdom.

ATKINSON'S CEMENT.—This Cement has hitherto been manufactured in Yorkshire, and, through long detention at sea, has often proved stale and unfit for use on its arrival in London. By the arrangement now made, the Cement will be manufactured in London, and thus presented to consumers in a fresh and genuine state, by the sole Agents, J. B. WHITE and SONS, Millbank-street, Westminster.

KEENE'S and PARIAN CEMENTS, for internal stucco, are employed very advantageously in lieu of wood for skirtings, architraves, and panel mouldings, and for in-door fittings, instead of stucco. The peculiar properties of PARIAN Cement allow of its being painted or papered upon within a few hours of its application, and thus render it an immediate substitute for common plastering in those cases where expedition and beauty of finish are essential.—J. B. WHITE and SONS, Millbank-street, Westminster, Patentees of KEENE'S Cement, Licensees of PARIAN Cement.

PORTLAND CEMENT, as manufactured by J. B. WHITE and SONS, possesses all the properties of the best Roman Cement but has the advantage over this material of usually resulting frost. When used as a stucco it does not crack or burn even in the hottest situations, and it may be painted as an hydraulic mortar for brickwork. It carries sand to five measures of sand to one of cement, and is proved by trial to become harder and stronger in these proportions than Roman Cement with but one measure of sand. This superior compound, combined with its extraordinary hydraulic properties, renders it out as the fittest material for building sea and embankment walls, the lining of reservoirs, cisterns, and baths, and for all those purposes where strength and a perfect resistance to water are required.

Manufactories—J. B. WHITE and SONS, Millbank-street, Westminster, and 36, Seel-street, Liverpool.

PORTLAND CEMENT, solely MANUFACTURED by WILLIAM ASPDIN, Son of the Inventor.—Messrs. SOUTHS, ASPDIN, and Co. request reference to No. 304, page 481; and also Nos. 304 and 305, pages 501 and 502 of "The Builder," for results of EXPERIMENTS on the strength of Portland Cement, whereby the great superiority of their Cement is manifest. This Cement has been proved for upwards of twenty years in the Thames Tunnel to resist the action of water; it is stronger in its constituents, harder, and more durable than any other description of cement; it does not vegetate, crystallize, or burn; grey or blue by any atmospheric influence whatever the climate, resists the action of frost and heat. It is manufactured to set in five to sixty minutes. For all purposes that Cement is applicable the Proprietors challenge competition.—Orders received by Messrs. SOUTHS, ASPDIN, and Company, at their Manufactory, Northfleet, Kent, and their Wharf, Great Scotland-yard, Whitehall; also by their Agents at the Depôt, 5, Black Horse, Liverpool.

MARTIN'S PATENT FIRE-PROOF and ORNAMENTAL CEMENT—REDUCTION of PRICE.—The Patentees beg to inform their Friends and the Public that they have made arrangements which enable them to offer this valuable cement at a considerably reduced price. It has now been before the public so many years, and has obtained so high a standing in the estimation of all who have used it, that it is unnecessary to recommend on its merits. The Patentees, however, feel bound to observe, that by its use—from the greater amount of work from a given quantity will accrue, and the small amount of labour required in working it, a saving of 10 to 20 per cent. is effected as compared with other cements for internal use. Specimens showing its beauty, hardness, and applicability to all plain or ornamental purposes, may be seen; and the Cement in any quantity obtained of the Patentees, Messrs. STEVENS and SON, Plaster and Cement Works, 128, Drury-lane, London.—And by Liverpool.

Mr. GEORGE NEWTON, No. 6, Lawton-street, Bold-street.

EMERSON'S PATENT LIQUID CEMENT is ready for use, is simple in its application, and only ONE-EIGHTH the cost of oil paint; for beauty it is pre-eminent over all other materials used on the fronts of houses, giving the exact appearance of PINE CUT STONE; can be used at once on fresh Roman cements or other plastering; is particularly calculated for country houses, villas, or gate entrances that have become soiled or dingy, which can be beautified in any weather, at a trifling cost.—Sold in casks of 1, 2, and 3 cwt., at 8s., 16s., and 24s. each.—C. BELL and Co., 14, Fenning-lane, Cheapside.

THE PARIAN CEMENT, for INTERNAL STUCCO, which was supplied at Messrs. J. & R. MORLEY'S warehouses and dwelling in Wood-street, Cheapside, in the City, has been used throughout the premises, in every story, altogether about ten thousand yards superficial, chiefly upon recently built walls, and a small portion upon timber partitions, and that with the most perfect and satisfactory result. I feel it also necessary to observe, that the plasterer's work was almost invariably followed up on the next day by the painters, thereby enabling me to have the buildings complete in the shortest possible time, both for business and for the completion of the establishment. I am, therefore, of opinion, that the use of this new material for such extensive feature in building operations and fully justifies that which I may give to understand, in that it was an extraordinary material. I think it right to mention that I am at the present time having a great extent of similar work executed at another range of buildings, where time and the quality of the work are of the utmost importance.

(Signed) JNO. WALLIS, Architect, London.

JORDAN'S PATENT MACHINE CARVING and MOULDING WORKS for WOOD and STONE, Belvedere-road, Lambeth, and 194, Strand.—TAYLOR, WILLIAMS, and JORDAN beg to call the attention of the building community to a new feature of their establishment, and, at the same time, to thank their numerous patrons and friends for the very liberal support they have lately experienced, which, they assure them and the public, it will be their constant endeavour to deserve, by giving their customers an increasing share of the advantages arising from the constant improvements in the machinery which they have just succeeded in applying to the production of the most intricate carving in Caen and other freestones, and in statuary marble.

T., W., and J. particularly solicit the attention of architects and builders to the fact that, by the use of this machinery, a very large saving, both of time and money, is effected,—no grand, indeed, that in many cases they can deliver a well-finished article in Caen stone for less money than it can be obtained in cement, while their wood-carving will, in some cases, be found to come into close competition with the best kinds of composition ornament.—For prices and estimates apply at 194, Strand.

TESTIMONIAL FROM CHARLES BARRY, ESQ.

"Westminster, May 19th, 1848.

"Gentlemen,—In reply to your letter requesting my opinion of your patent Carving Machinery, I have much pleasure in stating, from an experience of more than two years, in its application to the production of the wood carvings of the House of Peers, and other apartments of the New Palace, at Westminster, that I am enabled to rely on the most favourable report of everything it, and to add that it has more than justified the favourable terms in which I recommended it in 1845 to her Majesty's Commissioners of Woods and Works for adoption.—I remain, Gentlemen, yours faithfully,

"CHARLES BARRY."

Messrs. Taylor, Williams, and Jordan."

SNOXELL'S PATENT SAFETY REVOLVING WOOD SHUTTERS, Manufactory, 96, REGENT-STREET and 131, CHANCERY-LANE.
